

· Top 10 AI Prompts That Save You 5 Hours Every Week

Free Edition · by AI Toolkit Lab

You're using AI wrong. Most people type vague requests and get vague answers. These 10 prompts are the ones I use daily to run a company with 9 AI agents. They're specific, tested, and immediately useful.

Want the full 50? · [Get the Ultimate AI Prompt Pack](#)

How to Use This Guide

- 1 **Copy** the prompt exactly as written
 - 2 **Replace** the [bracketed text] with your specifics
 - 3 **Paste** into ChatGPT, Claude, or any AI assistant
 - 4 **Iterate** · the first output is your starting point, not your final answer
-

.. WRITING

1. The Email That Gets Replies

Prompt:

Write a professional email to [recipient role] about [topic].

Context:

- My role: [your role]
- Goal: [what you want them to do]
- Relationship: [cold/warm/existing]
- Tone: [friendly/formal/persuasive]

Requirements:

- Subject line that creates curiosity (not clickbait)
- Opening line that references THEIR priority, not mine
- One clear ask · make it easy to say yes
- Under 150 words
- End with a specific next step, not "let me know"

Example: "Write a professional email to a startup CEO about a potential AI automation project. My role: AI consultant. Goal: book a 15-minute call. Relationship: cold. Tone: friendly but professional."

Expected Output: A concise, action-oriented email with a compelling subject line, personalized opening, clear value proposition, and a specific CTA like "Would Thursday at 2pm work for a quick call?"

2. The Blog Post Outline Machine

Prompt:

Create a detailed blog post outline for the topic: "[topic]"

Target audience: [who]

Goal: [inform/persuade/educate/entertain]

Target length: [word count]

Include:

- A hook opening (story, statistic, or provocative question)
- 5-7 main sections with subpoints
- For each section: one data point or example to include
- SEO keywords to naturally weave in: [3-5 keywords]
- A conclusion with clear CTA
- 3 alternative title options (optimized for clicks + SEO)

Expected Output: A structured outline you can write (or have AI draft) in under 30 minutes, with built-in SEO optimization and engagement hooks.

· CODING

3. The Bug Whisperer

Prompt:

```
I have a bug in my [language/framework] code. Help me debug it.
**What should happen:** [expected behavior]
**What actually happens:** [actual behavior]
**Error message (if any):** [paste error]
**Code:**
```[language]
[paste your code]
```

Steps to reproduce:

- 1 [step 1]
- 2 [step 2]

What I've already tried:

- [attempt 1]
- [attempt 2]

Please:

- 1 Identify the root cause (not just the symptom)
- 2 Explain WHY it's happening
- 3 Provide the fix with explanation
- 4 Suggest how to prevent this type of bug in the future

```
Expected Output: A clear diagnosis with root cause analysis,
corrected code with inline comments, and preventive best practices.
```

```

```

```
4. The Code Reviewer
```

```
Prompt:
```

Review this [language] code for production readiness:

```
[paste code]
```

Evaluate on these dimensions (rate each 1-10):

- 1 **Correctness** · Does it do what's supposed to?

- 2 **Security** · Any vulnerabilities?
- 3 **Performance** · Any bottlenecks or inefficiencies?
- 4 **Readability** · Would a new team member understand this?
- 5 **Error handling** · What happens when things go wrong?

For each issue found:

- Severity: · Critical / · Warning / · Suggestion
- Location: Line number or function
- Fix: Show the corrected code

**\*\*Expected Output:\*\*** A structured code review with severity ratings, specific line references, and ready-to-apply fixes.

---

## · RESEARCH

### 5. The Instant Research Assistant

**\*\*Prompt:\*\***

I need to understand [topic] quickly and thoroughly.

Create a research brief that includes:

- 1 **Executive Summary** (3 sentences max)
- 2 **Key Concepts** · explain the 5 most important ideas, each in 2-3 sentences
- 3 **Current State** · what's happening right now (as of 2026)
- 4 **Key Players** · top 5 companies/people and why they matter
- 5 **Trends** · 3 emerging trends to watch
- 6 **Controversies** · what experts disagree about
- 7 **Numbers That Matter** · 5 key statistics
- 8 **Further Reading** · 5 recommended sources

Keep it factual. Flag anything you're uncertain about.

**\*\*Expected Output:\*\*** A comprehensive 1-page research brief that would take 3+ hours of manual research to compile.

---

### 6. The Decision Matrix Builder

**\*\*Prompt:\*\***

Help me decide between these options: [Option A] vs [Option B] vs [Option C]

Context: [what this decision is for] My priorities (ranked):

- 1 [most important factor]
- 2 [second factor]
- 3 [third factor]
- 4 [fourth factor]

For each option, evaluate:

- Score each priority 1-10 with brief justification
- List 3 pros and 3 cons
- Identify the biggest risk
- Estimate: cost, time to implement, difficulty (1-10)

Then:

- Create a weighted comparison table

- Give your recommendation with confidence level (high/medium/low)
- What would change your recommendation?

**\*\*Expected Output:\*\*** A structured decision matrix with weighted scores, clear trade-offs, and a defensible recommendation.

---

## · BUSINESS

### 7. The Competitor X-Ray

**\*\*Prompt:\*\***

Analyze [competitor name] as a competitor to my business.

My business: [brief description] My target market: [who you serve]

Research and provide:

- 1 **What they do well** · 3 specific strengths
- 2 **Where they're weak** · 3 specific gaps or complaints
- 3 **Their pricing model** · how they charge and approximate rates
- 4 **Their marketing channels** · where they get customers
- 5 **Their messaging** · what promise do they make?
- 6 **Customer sentiment** · common praise and complaints
- 7 **Opportunity for me** · where can I win against them?

Be specific. Use concrete examples, not generic statements.

**\*\*Expected Output:\*\*** An actionable competitive intelligence brief that reveals specific opportunities to differentiate.

---

### 8. The Meeting Maximizer

**\*\*Prompt:\*\***

I have a [meeting type] meeting in [timeframe].

Attendees: [who] Topic: [what] Goal: [desired outcome] Duration: [time]

Create:

- 1 **Agenda** with time allocations (be ruthless · cut anything that could be an email)
- 2 **Pre-read** · 3-sentence summary to send attendees beforehand
- 3 **Key questions** to drive discussion (5 max)
- 4 **Decision framework** · how we make decisions if there's disagreement
- 5 **Action item template** · format for capturing next steps

Rule: If this meeting can be replaced by an async message, tell me that instead.

**\*\*Expected Output:\*\*** A tight, outcome-focused meeting agenda that respects everyone's time and ensures decisions get made.

---

## · CREATIVE

### 9. The Content Calendar Generator

**\*\*Prompt:\*\***

Create a 2-week content calendar for [platform(s)].

Brand/Topic: [what you're about] Target audience: [who] Posting frequency: [how often per platform] Content pillars: [3-4 themes you want to cover] Tone: [professional/casual/witty/educational]

For each post provide:

- Day and platform
- Content type (text/image/video/carousel)
- Hook (first line that stops the scroll)
- Full caption/script
- Hashtags (platform-specific)
- CTA
- Best posting time

Also include:

- 1 "engagement bait" post (question/poll)
- 1 "value bomb" post (save-worthy tip)
- 1 "personal/behind-the-scenes" post

**\*\*Expected Output:\*\*** 14 days of ready-to-post content with captions, hashtags, and posting times · no more staring at a blank screen.

---

### 10. The Universal Prompt Improver

**\*\*Prompt:\*\***

I wrote this AI prompt but the output isn't great:

"" [paste your current prompt] ""

The output I'm getting: [describe the problem] What I actually want: [describe ideal output]

Please:

- 1 Diagnose why my prompt isn't working (be specific)
- 2 Rewrite it using these principles:
  - Clear role assignment
  - Specific context and constraints
  - Structured output format
  - Examples of good vs bad output
- 3 Show me the improved prompt
- 4 Explain what you changed and why

Bonus: Give me 3 variations of the improved prompt for different use cases.

**\*\*Expected Output:\*\*** A dramatically improved prompt with clear diagnosis of what went wrong and reusable prompt engineering principles you can apply to any future prompt.

---

## · Want All 50 Prompts?

This free pack covers 10 essentials. **\*\*The full Ultimate AI Prompt Pack includes:\*\***
