

The Ultimate AI Prompt Pack

50 Battle-Tested Prompts for Productivity

Version: 1.0 | **Last Updated:** February 2026

Author: AI Toolkit Lab

License: Personal & commercial use allowed. Redistribution prohibited.

How to Use This Pack

- 1 **Copy** the prompt exactly as written
- 2 **Customize** the [bracketed variables] with your specifics
- 3 **Paste** into ChatGPT, Claude, Gemini, or any LLM
- 4 **Iterate** · use the follow-up suggestions for better results

• **Pro Tip** · For best results, use GPT-4 / Claude 3.5+ / Gemini Advanced. These prompts work with free tiers too, but premium models give significantly better output.

Quick Reference Card

Category	Prompts	Best For	----- ----- -----	· Writing	#1-#10	Content creation, editing, copywriting
· Coding	#11-#20	Development, debugging, architecture	Research	#21-#30	Analysis, synthesis, learning	Business
Strategy, operations, decisions	· Creative	#41-#50	Ideation, design, storytelling			

·· WRITING (Prompts #1-#10)

Prompt #1: The Expert Blog Post Generator

Prompt:

```
You are an expert content strategist and SEO writer. Write a comprehensive blog post about [TOPIC].
Requirements:
- Target audience: [AUDIENCE]
- Tone: [professional/conversational/authoritative]
- Length: 1,500-2,000 words
- Include an attention-grabbing headline with a power word
- Start with a hook that presents a surprising statistic or counterintuitive insight
- Use the AIDA framework (Attention, Interest, Desire, Action)
- Include 5-7 subheadings (H2) optimized for SEO
- Add 3 actionable takeaways in a "Key Takeaways" box at the top
- End with a specific CTA
- Naturally incorporate these keywords: [KEYWORD 1], [KEYWORD 2], [KEYWORD 3]
Format the output in Markdown with proper heading hierarchy.
```

Example Use:

- **Topic:** "AI tools for small business owners"
- **Audience:** Non-technical small business owners, age 30-55
- **Tone:** Conversational
- **Keywords:** "AI for small business," "AI productivity tools," "automate business tasks"

Expected Result:

A publish-ready blog post with SEO-optimized headings, natural keyword integration, engaging intro, and clear structure that would typically take 3-4 hours to write manually.

Prompt #2: The Email Sequence Architect

Prompt:

Design a [NUMBER]-email welcome sequence for [BUSINESS TYPE].
For each email, provide:

1. Subject line (+ 2 A/B test alternatives)
2. Preview text (40-60 characters)
3. Full email body
4. CTA button text
5. Send timing (delay from previous email)

Context:

- Product/Service: [PRODUCT]
- Target audience: [AUDIENCE]
- Main goal of sequence: [GOAL · e.g., convert free trial to paid]
- Brand voice: [VOICE · e.g., friendly expert, no jargon]
- Key objections to address: [OBJECTION 1], [OBJECTION 2], [OBJECTION 3]

Use the following sequence structure:

- Email 1: Welcome + immediate value delivery
- Email 2: Story-driven problem agitation
- Email 3: Social proof + case study
- Email 4: Objection handling
- Email 5: Urgency + final CTA

Keep each email under 200 words. Write like a human, not a marketer.

Example Use:

- **Business:** Online course platform
- **Product:** "AI Mastery Course" (\$199)
- **Goal:** Convert free mini-course takers to paid enrollment
- **Objections:** "Too expensive," "I'm not technical," "No time"

Expected Result:

A complete 5-email sequence with subject lines, body copy, and timing · ready to load into any email marketing

Prompt #3: The Content Repurposer

Prompt:

I have the following content that I want to repurpose across multiple platforms. Transform it into ALL of the formats below while maintaining the core message and adapting tone for each platform.

Original content:

""

[PASTE YOUR CONTENT · blog post, newsletter, video transcript, etc.]

""

Create these versions:

1. ****X/Twitter Thread**** (8-12 tweets)
 - Hook tweet that stops the scroll
 - Each tweet stands alone but builds a narrative
 - End with CTA + thread summary
2. ****LinkedIn Post**** (1,200-1,500 characters)
 - Professional but personal tone
 - Start with a bold first line
 - Use line breaks for readability
 - End with a question to drive comments
3. ****Instagram Caption**** (under 2,200 characters)
 - Engaging first line (no "Hey guys")
 - Storytelling approach
 - 5-10 relevant hashtags
 - CTA to save/share
4. ****YouTube Short/TikTok Script**** (45-60 seconds)
 - Pattern interrupt opening (first 3 seconds)
 - Conversational, high-energy
 - End with hook for engagement
5. ****Newsletter Snippet**** (150-200 words)
 - Subject line + preview text
 - One key insight + one CTA

Example Use:

Paste a 1,500-word blog post about remote work productivity tips.

Expected Result:

5 platform-optimized content pieces from a single source, saving 3-4 hours of rewriting per piece of content.

Prompt #4: The Ruthless Editor

Prompt:

You are a world-class editor who has edited for The New Yorker, The

Atlantic, and top bestselling authors. Your editing philosophy: every word must earn its place.

Edit the following text with THREE passes:

****Pass 1 · Clarity & Structure:****

- Flag confusing sentences
- Suggest reordering for better flow
- Identify missing transitions
- Mark redundant paragraphs

****Pass 2 · Concision & Power:****

- Cut word count by 20-30% without losing meaning
- Replace weak verbs with strong ones
- Eliminate weasel words (very, really, quite, somewhat)
- Convert passive voice to active
- Tighten every sentence

****Pass 3 · Polish & Voice:****

- Ensure consistent tone: [DESIRED TONE]
- Improve rhythm and sentence variety
- Strengthen the opening and closing
- Add sensory or specific details where vague

For each change, show:

- Original · Edited (strikethrough format)
- Brief reason for the change

Text to edit:

""

[PASTE TEXT]

""

After all three passes, provide the final clean version.

Example Use:

Paste a 500-word draft of a product description or personal essay.

Expected Result:

A professionally edited piece that's 20-30% shorter, significantly more engaging, with tracked changes and rationale for each edit. Like having a \$500/hour editor on demand.

Prompt #5: The Persuasive Copywriter

Prompt:

Write conversion-optimized copy for [ASSET TYPE] using the PAS framework (Problem-Agitate-Solve).

Product/Service: [PRODUCT]

Target customer: [DETAILED PERSONA · age, role, pain points, desires]

Unique selling proposition: [USP]

Price point: [PRICE]

Main competitor: [COMPETITOR]

Asset type: [CHOOSE ONE]

- Landing page hero section + 3 feature sections
- Sales page (long-form, 1,500+ words)
- Product description (300 words)

· Ad copy (Facebook/Google · 3 variations)

Requirements:

- Lead with the customer's #1 pain point, not the product
- Use specific numbers and outcomes (not "boost productivity" · "save 12 hours/week")
- Include at least 2 social proof elements
- Address the top objection in the copy itself
- Write 3 headline options (test-ready)
- One-line CTA that creates urgency without being sleazy

Example Use:

- **Product:** Project management SaaS (\$29/month)
- **Persona:** Overwhelmed startup founders, age 28-40
- **USP:** "AI auto-assigns tasks based on team capacity"
- **Competitor:** Asana
- **Asset:** Landing page

Expected Result:

High-converting copy with headlines, body copy, feature descriptions, and CTA · structured to move visitors through the awareness-consideration-decision pipeline.

Prompt #6: The Tone Adapter

Prompt:

Rewrite the following text in [NUMBER] different tones/styles. Keep the core information identical but adapt the language, structure, and vocabulary for each version.

Original text:

""

[PASTE TEXT]

""

Versions to create:

1. ****Corporate Professional**** · Fortune 500 annual report style
2. ****Casual Conversational**** · Talking to a friend over coffee
3. ****Academic Formal**** · Peer-reviewed journal style
4. ****Gen Z Social Media**** · Authentic, relatable, current slang (not cringey)
5. ****Storytelling/Narrative**** · Open with "Imagine this..." or a character

For each version, also note:

- Best use case for this tone
- Platform it works best on
- What makes this tone effective here

Example Use:

A 200-word paragraph explaining the benefits of cloud computing.

Expected Result:

5 distinct versions of the same content, each perfectly calibrated for its context. Essential for marketers who need to reach different segments with the same message.

Prompt #7: The Headline Factory

Prompt:

Generate 30 headline options for the following content, organized by psychological trigger:
Content topic: [TOPIC]
Target audience: [AUDIENCE]
Content type: [blog post / email / ad / video / landing page]
Key benefit: [MAIN BENEFIT]
Create 5 headlines for each category:
1. ****Curiosity Gap**** . Make them need to know more
2. ****Specific Numbers**** . Concrete, credible claims
3. ****How-To / Utility**** . Clear value promise
4. ****Contrarian / Myth-Busting**** . Challenge conventional wisdom
5. ****Social Proof / Authority**** . Leverage credibility
6. ****Fear of Missing Out**** . Urgency and exclusivity
For each headline:
- Rate its estimated CTR potential (1-10)
- Note which platform it's best suited for
- Flag any that might feel clickbait-y (to avoid)
Then pick your TOP 3 overall and explain why.

Example Use:

- **Topic:** Time management techniques for remote workers
- **Audience:** Remote employees aged 25-40
- **Type:** Blog post
- **Benefit:** Reclaim 2 hours per day

Expected Result:

30 headline options organized by psychological trigger, with ratings and platform recommendations. Eliminates hours of brainstorming and A/B test guessing.

Prompt #8: The Grammar & Style Fixer

Prompt:

Proofread and correct the following text. For each correction, use this format:
· Original: [wrong text]
· Corrected: [fixed text]
· Rule: [brief grammar/style rule explanation]
Categories to check:

1. Grammar errors (subject-verb agreement, tense consistency, etc.)
2. Punctuation (commas, semicolons, em dashes)
3. Spelling and typos
4. Style issues (wordiness, passive voice, unclear antecedents)
5. Formatting consistency

After corrections, provide:

- Overall quality score (1-10)
- Top 3 recurring issues to watch for in future writing
- The fully corrected clean version

Text:

"""

[PASTE TEXT]

"""

Style guide to follow: [AP Style / Chicago Manual / none · just general best practices]

Example Use:

Paste a 500-word email draft with various grammatical issues.

Expected Result:

A comprehensive markup with corrections, rules, and a clean final version · plus personalized feedback on writing patterns to improve.

Prompt #9: The Meeting Notes Transformer

Prompt:

Transform the following raw meeting notes/transcript into a structured, actionable document.

Raw notes:

"""

[PASTE MEETING NOTES OR TRANSCRIPT]

"""

Create the following sections:

Meeting Summary (3-5 sentences max)

Key Decisions Made

- [Decision] · Made by: [Person] · Date effective: [Date]

Action Items

#	Task	Owner	Deadline	Priority	Dependencies
---	------	-------	----------	----------	--------------

---	-----	-----	-----	-----	-----
-----	-------	-------	-------	-------	-------

Open Questions / Parking Lot

- [Question] · Needs input from: [Person]

Key Discussion Points

(Organized by topic, not chronological)

Follow-Up Meeting Needed?

- Yes/No · Suggested date: · Key agenda items:

Rules:

- If someone's name is unclear, mark as [UNCLEAR - verify]
- If a deadline wasn't specified, suggest one based on context
- Flag any decisions that seem to contradict previous ones

- Keep total output under 500 words

Example Use:

Paste a messy, 2,000-word transcript of a team standup or strategy meeting.

Expected Result:

A clean, structured summary that can be immediately shared with all attendees · with clear ownership, deadlines, and follow-ups. Turns a 30-minute review task into a 2-minute paste.

Prompt #10: The LinkedIn Thought Leadership Post

Prompt:

Write a LinkedIn post that positions me as a thought leader on [TOPIC].
About me:
- Role: [YOUR ROLE]
- Industry: [YOUR INDUSTRY]
- Unique perspective: [WHAT MAKES YOUR VIEW DIFFERENT]
- Goal: [awareness / leads / engagement / hiring]
Post structure (choose one):
A) **Contrarian Take:** "Everyone says X. I think Y. Here's why."
B) **Lesson Learned:** "I made this mistake. Here's what it taught me."
C) **Framework Share:** "I use this 3-step framework for [RESULT]."
D) **Data Insight:** "I analyzed [DATA]. Here's what I found."
Requirements:
- First line: pattern interrupt (bold statement, question, or number)
- Short paragraphs (1-2 sentences each)
- Use line breaks liberally (LinkedIn rewards readability)
- Include a personal anecdote or specific example
- End with a question to drive comments
- 1,200-1,500 characters total
- No hashtags in the body (add 3-5 at the very end)
- No emojis in the first line

Example Use:

- **Topic:** AI replacing jobs
- **Role:** CTO at a 50-person startup
- **Perspective:** "AI won't replace workers · workers who use AI will replace those who don't"
- **Structure:** Contrarian Take

Expected Result:

A LinkedIn post optimized for the algorithm (short paragraphs, engagement hooks) that sounds authentically human, not AI-generated. Designed to generate comments and profile visits.

· CODING (Prompts #11-#20)

Prompt #11: The Code Review Partner

Prompt:

```
Review the following code as a senior engineer conducting a
thorough code review. Be constructive but honest.
```[LANGUAGE]
[PASTE YOUR CODE]
```

Review criteria (rate each 1-10):

- 1 **Correctness** · Does it do what's supposed to?
- 2 **Readability** · Can another developer understand this in 60 seconds?
- 3 **Performance** · Any obvious bottlenecks or  $O(n^2)$  traps?
- 4 **Security** · Input validation, injection risks, auth issues?
- 5 **Error Handling** · Edge cases, graceful failures?
- 6 **DRY/SOLID** · Repeated logic, single responsibility violations?
- 7 **Testing** · Is this testable? Suggest key test cases.

For each issue found:

- · Critical (must fix)
- · Improvement (should fix)
- · Nitpick (nice to have)

Provide:

- The specific line/section
- What's wrong
- How to fix it (with code)
- Why it matters

End with an overall rating and the single most impactful improvement.

```
Example Use:
Paste a 100-line Python function that handles user authentication.
Expected Result:
A structured code review with prioritized issues, specific fixes,
and educational explanations · like having a senior engineer
pair-program with you on demand.

Prompt #12: The Bug Detective
Prompt:
```

I'm experiencing a bug and need help debugging. Act as a senior developer who's seen this kind of issue hundreds of times.

**Language/Framework:** [e.g., Python/FastAPI, TypeScript/React, etc.]

**What I expected to happen:** [EXPECTED BEHAVIOR]

**What actually happens:** [ACTUAL BEHAVIOR]

**Error message (if any):**

[PASTE ERROR]

**Relevant code:**

[PASTE CODE]

**What I've already tried:**

- [ATTEMPT 1]
- [ATTEMPT 2]

**Environment:**

- OS: [OS]
- Runtime version: [e.g., Node 20, Python 3.12]
- Key dependencies: [relevant packages and versions]

Please:

- 1 Identify the most likely root cause
- 2 Explain WHY this happens (not just the fix)
- 3 Provide the corrected code
- 4 Suggest how to prevent this class of bug in the future
- 5 If there are multiple possible causes, rank them by probability

### Example Use:

A React component that re-renders infinitely when using useEffect with a dependency array.

### Expected Result:

Root cause analysis with explanation, fixed code, and prevention strategies · dramatically faster than Stack Overflow searching because the context is fully understood.

---

## Prompt #13: The Architecture Advisor

### Prompt:

I need to design the architecture for a new system. Act as a principal engineer / solution architect.

**Project:** [PROJECT DESCRIPTION] **Scale:** [Expected users / requests per second / data volume] **Team size:** [NUMBER] developers **Timeline:** [TIMELINE] **Budget constraints:** [e.g., minimal cloud spend, open-source only] **Current tech stack:** [EXISTING TECHNOLOGIES]

Please provide:

- 1 **Architecture Diagram** (ASCII art)
  - Show all major components and their interactions
  - Label data flow directions
  - Mark synchronous vs asynchronous communication
- 2 **Technology Recommendations** | Component | Recommended | Alternative | Why |  
|-----|-----|-----|-----|
- 3 **Database Design**
  - SQL vs NoSQL decision (with reasoning)
  - Key entities and relationships
  - Indexing strategy

#### 4 API Design

- REST vs GraphQL vs gRPC (with reasoning)
- Key endpoints
- Authentication strategy

#### 5 Scalability Considerations

- What breaks first at 10x scale?
- Caching strategy
- Queue/async processing needs

#### 6 Top 3 Risks and mitigation strategies

Keep recommendations pragmatic · optimize for shipping fast with a small team, not theoretical perfection.

### Example Use:

Building a real-time collaborative note-taking app with AI features, targeting 10K MAU initially.

### Expected Result:

A comprehensive architecture document that a team can actually follow, with pragmatic trade-offs explained. Saves days of planning and prevents costly mid-project pivots.

---

## Prompt #14: The Test Generator

### Prompt:

Generate comprehensive tests for the following code. Cover happy paths, edge cases, and error scenarios.

[PASTE YOUR CODE]

Testing framework: [Jest / pytest / JUnit / Go testing / RSpec / other]

Generate tests in this structure:

##### 1 Happy Path Tests (expected usage)

- Normal inputs · expected outputs
- All documented features working

##### 2 Edge Case Tests

- Empty inputs, null/undefined/None
- Boundary values (0, -1, MAX\_INT, empty string)
- Very large inputs
- Unicode / special characters
- Concurrent access (if applicable)

##### 3 Error Handling Tests

- Invalid input types
- Missing required fields
- Network failures / timeouts (if applicable)
- Permission/auth failures (if applicable)

##### 4 Integration Tests (if the code interacts with external services)

- Mock suggestions for external dependencies
- Test data factories

For each test:

- Descriptive test name (should read like documentation)
- Arrange-Act-Assert structure
- Clear comments explaining WHAT and WHY

Also provide:

- Estimated code coverage percentage
- Any untestable parts and how to refactor them for testability

```
Example Use:
Paste a function that processes and validates user registration
data.
Expected Result:
A complete test suite with 15-25 tests covering all scenarios ·
directly runnable. Turns a 2-hour testing task into a 10-minute
review-and-customize task.

Prompt #15: The Documentation Writer
Prompt:
```

Write professional documentation for the following code. Act as a technical writer at a top-tier software company.

[PASTE YOUR CODE]

Generate:

- 1 **Overview** (2-3 sentences · what this does and why)
- 2 **Quick Start**  
    // Minimal working example · copy-paste-run
- 3 **API Reference** For each public function/method/class:
  - Description
  - Parameters (name, type, required?, default, description)
  - Return value (type + description)
  - Exceptions/errors thrown
  - Example usage
- 4 **Configuration Options** (if applicable) | Option | Type | Default | Description |  
|-----|-----|-----|-----|
- 5 **Common Patterns / Recipes**
  - 3-5 real-world usage examples
  - Do's and Don'ts
- 6 **Troubleshooting / FAQ**
  - Top 5 likely issues and solutions
- 7 **Changelog Template**
  - Version, date, changes

Format in clean Markdown. Prioritize practical examples over theoretical descriptions.

```
Example Use:
Paste a utility library with 5-10 functions (e.g., date formatting,
```

```
API wrapper, validation helpers).
Expected Result:
Production-quality documentation that you'd be proud to publish on
GitHub or a developer portal. Saves 4-6 hours of documentation
writing per module.

Prompt #16: The Regex Craftsman
Prompt:
```

I need a regular expression for the following requirement. Act as a regex expert.

**What I need to match:** [DESCRIBE IN PLAIN ENGLISH]

**Valid examples (should match):**

- [EXAMPLE 1]
- [EXAMPLE 2]
- [EXAMPLE 3]

**Invalid examples (should NOT match):**

- [EXAMPLE 1]
- [EXAMPLE 2]
- [EXAMPLE 3]

**Language/Engine:** [JavaScript / Python / Java / PCRE / other]

Please provide:

- 1 The regex pattern
- 2 Annotated version (explain each part)
- 3 Test it against all my examples (show match/no-match)
- 4 Edge cases I might not have considered
- 5 Performance notes (any catastrophic backtracking risks?)
- 6 A simpler alternative if the regex gets too complex
- 7 Code snippet showing how to use it in [LANGUAGE]

```
Example Use:
"Match email addresses, but only corporate ones (not gmail, yahoo,
hotmail, etc.)"
Expected Result:
A tested, annotated regex with code snippet, edge cases, and
performance analysis. Eliminates the regex-debugging-for-3-hours
experience.

Prompt #17: The Refactoring Guru
Prompt:
```

Refactor the following code for better readability, maintainability, and performance. Act as a staff engineer performing a major refactoring.

[PASTE YOUR CODE]

Refactoring priorities:

- 1 [Choose: readability / performance / testability / all]

Rules:

- Preserve ALL existing functionality (zero behavior changes)
- Each refactoring step should be a separate, atomic change
- Explain the "before" problem and "after" benefit for each step

Show the refactoring as a series of steps:

### Step 1: [Name of refactoring]

**Why:** [Problem with current code] **Before:**

[original code section]

**After:**

[refactored code section]

**Impact:** [What improved and by how much]

[Continue for all steps...]

### Final Result

[Complete refactored code]

### Summary

- Lines of code: [before] · [after]
- Cyclomatic complexity: [before] · [after]
- Key improvements: [list]

### Example Use:

Paste a 200-line "god function" that handles too many responsibilities.

### Expected Result:

A step-by-step refactoring guide with rationale, showing the code evolving from messy to clean. Each step is safe and atomic, so you can apply them incrementally.

---

## Prompt #18: The API Endpoint Builder

### Prompt:

Build a complete REST API endpoint with the following specification:

**Endpoint:** [METHOD] [PATH] (e.g., POST /api/v1/users) **Framework:** [Express / FastAPI / Django / Spring / Go Gin / other] **Database:** [PostgreSQL / MongoDB / MySQL / other] **ORM/ODM:** [Prisma / SQLAlchemy / Mongoose / other] **Auth:** [JWT / API Key / OAuth / None]

**Request:**

```
{
 // Expected request body
 [DESCRIBE FIELDS]
}
```

**Response (success):**

```
{
 // Expected response
 [DESCRIBE FIELDS]
}
```

**Business rules:**

- [RULE 1]
- [RULE 2]

Generate:

- 1 **Route/Controller** · Input validation, auth check, business logic, response
- 2 **Service Layer** · Business logic extracted from controller
- 3 **Database Model/Schema** · With proper types, constraints, indexes
- 4 **Validation Schema** · Request body validation (Zod / Pydantic / Joi)
- 5 **Error Handling** · Custom error responses for each failure case
- 6 **Tests** · At least 5 tests (happy path + error cases)
- 7 **API Documentation** · OpenAPI/Swagger snippet

Follow [LANGUAGE] best practices and conventions.

```
Example Use:
POST /api/v1/orders · E-commerce order creation endpoint with
inventory checking.
Expected Result:
A production-grade API endpoint with all layers, validation, error
handling, tests, and documentation. Ready to integrate into your
codebase.

Prompt #19: The Database Query Optimizer
Prompt:
```

Optimize the following database query. Act as a DBA with 15 years of experience.

**Database:** [PostgreSQL / MySQL / MongoDB / other] **Table size:** [approximate row count] **Current execution time:** [if known]

**Current query:**

[PASTE YOUR QUERY]

**Table schema:**

[PASTE CREATE TABLE or describe the schema]

**Current indexes:**

[LIST EXISTING INDEXES]

Please provide:

- 1 **Analysis** · Why is this query slow?
  - Execution plan explanation (what would EXPLAIN show)
  - Identified bottlenecks
- 2 **Optimized Query** · Rewritten for performance
  - Explain each change

### 3 Index Recommendations

- New indexes to create (with CREATE INDEX statements)
- Indexes to remove (if redundant)
- Composite index ordering rationale

### 4 Performance Estimate

- Expected improvement (rough %)
- Trade-offs (write speed impact, storage increase)

### 5 Alternative Approaches

- Denormalization options
- Caching strategies
- Materialized views (if applicable)

### 6 Monitoring Query

- SQL to check if the optimization worked

### Example Use:

A JOIN query on 3 tables with 10M+ rows that takes 8 seconds.

### Expected Result:

A comprehensive optimization plan with rewritten query, index recommendations, and measurable improvement estimates. Like having a DBA consultant for free.

---

## Prompt #20: The Git Commit Message Writer

### Prompt:

Write a professional git commit message for the following changes. Follow the Conventional Commits specification.

#### Changed files and diffs:

[PASTE YOUR GIT DIFF · or describe the changes]

#### Context:

- Feature/bug ticket: [TICKET-123 or description]
- Is this a breaking change? [yes/no]

Generate:

#### 1 Conventional commit message:

```
type(scope): subject
body (what and why, not how)
footer (breaking changes, ticket reference)
```

#### 2 3 alternative subject lines (different wording)

#### 3 PR description (if this were a pull request):

- Summary
- Changes made
- Testing done
- Screenshots needed? [yes/no · describe what to capture]

Types: feat, fix, refactor, docs, test, chore, perf, style, ci Keep subject under 72 characters. Use imperative mood.

### Example Use:

Paste a diff showing you added input validation to a user registration form.

### Expected Result:

A perfectly formatted commit message + PR description following team conventions. Eliminates the "what do I write" moment and keeps git history clean.

---

# · RESEARCH (Prompts #21-#30)

---

## Prompt #21: The Research Synthesizer

### Prompt:

I need to deeply understand [TOPIC]. Act as a research analyst who synthesizes complex information into clear insights.

My current knowledge level: [beginner / intermediate / advanced] Purpose of research: [REASON · decision making, writing, presentation, etc.] Time I have: [how deep should you go?]

Provide:

1 **Executive Summary** (5 sentences max)

- What this is, why it matters, and the current state

2 **Key Concepts** (explain like I'm smart but unfamiliar) | Concept | Simple Explanation | Why It Matters | |-----|-----|-----|

3 **Current State of the Art** (2026)

- What's working now
- What's emerging
- What's declining

4 **Major Players / Voices**

- Top 5 experts/companies to follow
- Key publications/resources

5 **Competing Viewpoints**

- View A: [argument + who holds it]
- View B: [counter-argument + who holds it]
- Your synthesis: [which has more evidence]

6 **Practical Implications**

- "So what?" · What does this mean ~~for~~ [MY CONTEXT]?
- 3 actions I could take based on this research

7 **Further Reading** (5 specific recommendations)

- [Title] · why this one (1 sentence each)

### Example Use:

"I need to understand the current state of AI agents · autonomous AI systems that can take actions. I'm intermediate-level. I'm deciding whether to build an AI agent product for my startup."

### Expected Result:

A comprehensive yet concise research brief that would take 8-10

hours of reading to compile manually. Structured for decision-making, not just information.

---

## Prompt #22: The Debate Simulator

### Prompt:

I'm considering [DECISION/TOPIC]. Simulate a structured debate between two expert personas with opposing views.

**Topic:** [STATE THE PROPOSITION]

**Persona A (FOR):** [Name], [Role] · argues in favor **Persona B (AGAINST):** [Name], [Role] · argues against

Debate structure:

**Round 1 · Opening Statements** (each 200 words)

- A presents strongest case FOR
- B presents strongest case AGAINST

**Round 2 · Rebuttals** (each 150 words)

- A responds to B's strongest points
- B responds to A's strongest points

**Round 3 · Evidence & Examples** (each 150 words)

- Each cites specific data, case studies, or examples

**Round 4 · Closing Statements** (each 100 words)

- Final persuasive argument

**Moderator's Analysis:**

- Strongest arguments from each side
- Logical fallacies spotted (if any)
- Missing perspectives
- Final assessment: which side has stronger evidence?
- Key factors that would tip the decision either way

### Example Use:

"Should our startup go all-in on AI or maintain our traditional product line?"

### Expected Result:

A rigorous intellectual exercise that stress-tests your thinking from both sides. The moderator's analysis often reveals blind spots and key decision factors you hadn't considered.

---

## Prompt #23: The Concept Explainer (Feynman Technique)

### Prompt:

Explain [COMPLEX CONCEPT] using the Feynman Technique · as if teaching someone who's smart but knows nothing about this field.

Rules:

- 1 No jargon. If you must use a technical term, define it immediately.
- 2 Use at least 3 analogies from everyday life.

- 3 Build from simple to complex, one layer at a time.
- 4 After each layer, include a "Check yourself" question.

Structure:

## The 30-Second Version

[Explain the core idea in 2-3 sentences a 10-year-old could understand]

## The 5-Minute Version

[Layer 1: Foundation concept + everyday analogy] · Check question to test understanding]

[Layer 2: Add nuance + second analogy] · Check question]

[Layer 3: Real-world implications + third analogy] · Check question]

## The "Actually..." Section

[Common misconceptions about this topic · and why they're wrong]

## The "Go Deeper" Path

[What to learn next, in what order, to truly master this]

```

Example Use:
"Explain how large language models (LLMs) work."
Expected Result:
A layered explanation that anyone can follow, building genuine
understanding rather than surface knowledge. The "Check yourself"
questions ensure real comprehension.

Prompt #24: The Data Analyzer
Prompt:

```

Analyze the following data and extract actionable insights. Act as a senior data analyst.

**Data:**

[PASTE YOUR DATA · CSV, JSON, table, or describe the dataset]

**Context:** [What this data represents and where it came from] **Question I'm trying to answer:** [YOUR CORE QUESTION]

Provide:

### 1 Data Quality Check

- Missing values, outliers, inconsistencies
- Caveats that affect interpretation

### 2 Descriptive Statistics

- Key metrics (mean, median, range, distribution shape)
- Notable patterns at a glance

### 3 Trend Analysis

- What's going up/down/flat?
  - Seasonality or cyclical patterns?
  - Anomalies worth investigating
- 4 **Key Insights** (top 5, ranked by business impact) | # | Insight | Evidence | Confidence | Suggested Action | |---|-----|-----|-----|-----|
- 5 **Correlations** (if multiple variables)
- What moves together?
  - ·· Correlation · causation disclaimers
- 6 **Visualization Recommendations**
- Which charts would best show these insights?
  - What to put on each axis
- 7 **Next Questions**
- What additional data would you want?
  - What hypotheses should we test next?

### Example Use:

Paste 3 months of website traffic data (date, page views, bounce rate, conversion rate, traffic source).

### Expected Result:

A complete analytical report with actionable insights, not just numbers. Designed for decision-makers who need "so what?" answers, not statistical jargon.

---

## Prompt #25: The Comparison Matrix Builder

### Prompt:

Create a comprehensive comparison of [OPTION A] vs [OPTION B] vs [OPTION C] for [USE CASE].

My context:

- Budget: [BUDGET]
- Team size: [SIZE]
- Technical skill level: [LEVEL]
- Most important factor: [FACTOR]
- Deal-breakers: [MUST-HAVE or CAN'T-HAVE]

Comparison structure:

Quick Verdict (1 sentence each)

- Best overall: [and why]
- Best value: [and why]
- Best for power users: [and why]

Feature Comparison Matrix

| Feature | Option A | Option B | Option C | Weight | |-----|-----|-----|-----|-----| [Compare 15-20 features with ... and nots

Pricing Analysis

| Tier | Option A | Option B | Option C | [Include hidden costs, per-user pricing, annual vs monthly]

## Pros & Cons (top 3 each)

## Migration / Switching Costs

- From current setup · each option
- From each option · another (vendor lock-in risk)

## My Recommendation

Given your specific context: [RECOMMENDATION with reasoning]

## Decision Framework

"Choose A if... Choose B if... Choose C if..."

```
Example Use:
Compare Notion vs Obsidian vs Logseq for a 10-person remote team's
knowledge management.
Expected Result:
A decision-ready comparison that accounts for your specific needs,
not just generic feature lists. The "Choose X if..." framework
makes the final decision simple.

Prompt #26: The Book Summary & Action Extractor
Prompt:
```

Provide a comprehensive but actionable summary of the book "[BOOK TITLE]" by [AUTHOR].

Structure:

## One-Sentence Summary

[The core thesis in one sentence]

## The Book in 3 Key Ideas

- 1 [Idea + 2-sentence explanation]
- 2 [Idea + 2-sentence explanation]
- 3 [Idea + 2-sentence explanation]

## Chapter-by-Chapter Summary (2-3 sentences each)

[For each chapter or major section]

## Key Quotes (top 5)

"[Quote]" · Why it matters [1:sentence]

## Actionable Takeaways

| # | Action | When to Apply | Expected Impact | |---|-----|-----|-----| [5-10 specific actions I can take THIS WEEK]

## Who Should Read This

- Ideal reader: [description]
- Skip if: [description]

## What Critics Say

- Common praise: [theme]
- Common criticism: [theme]

## Pair This Book With

- [Book 1] · [why they complement each other]
- [Book 2] · [why]
- [Opposing view: Book 3] · [for balance]

### Example Use:

"Deep Work" by Cal Newport

### Expected Result:

A comprehensive summary that captures the book's value in 10 minutes instead of 6 hours of reading. The actionable takeaways table is the highlight · turns theory into practice.

---

## Prompt #27: The Trend Forecaster

### Prompt:

Analyze current trends in [INDUSTRY/TOPIC] and provide a forecast.

**Timeframe:** [6 months / 1 year / 3 years / 5 years] **My role/interest:** [WHY I NEED THIS · investing, career, business strategy]

Provide:

### 1 Current State (snapshot)

- Market size / adoption rate
- Key players
- Technology maturity level

### 2 Active Trends (happening now) | Trend | Strength (1-10) | Direction | Impact Timeline |

|-----|-----|-----|-----|

### 3 Emerging Signals (early but potentially big)

- Weak signals to watch
- Leading indicators

### 4 Scenario Planning | Scenario | Probability | Key Driver | Implications |

|-----|-----|-----|-----| | Optimistic | % | | | Base case | % | | | Pessimistic | % | | |

### 5 Winners & Losers (if trends continue)

- Who benefits most?
- Who's at risk?

- Where are the opportunities?
- 6 **Actionable Recommendations** Given my role: [3-5 specific moves to make in the next 90 days]
- 7 **What Would Change This Forecast**

- Wildcards that could accelerate or reverse trends

### Example Use:

"AI industry trends for the next 12 months · I'm deciding whether to pivot my SaaS to AI-native."

### Expected Result:

A structured trend analysis with scenario planning and specific recommendations. Not a generic "AI is growing" take, but nuanced forecasting with probability assessments.

---

## Prompt #28: The Learning Path Designer

### Prompt:

Design a structured learning path for me to go from [CURRENT LEVEL] to [TARGET LEVEL] in [SKILL/TOPIC].

**My context:**

- Current knowledge: [WHAT I ALREADY KNOW]
- Available time: [HOURS PER WEEK]
- Learning style: [reading / video / hands-on / mixed]
- Goal: [WHY I'm learning this · job, project, curiosity]
- Deadline: [WHEN I need to be competent]

Create:

## Learning Roadmap

### Phase 1: Foundation (Week 1-[X])

**Goal:** [What I'll be able to do after this phase] | Resource | Type | Time | Priority | Free? |

|-----|-----|-----|-----| [5-8 specific resources with URLs or titles] **Milestone Project:** [Small project to verify understanding]

### Phase 2: Intermediate (Week [X]-[Y])

**Goal:** [What I'll be able to do] [Same structure] **Milestone Project:** [Medium project]

### Phase 3: Advanced (Week [Y]-[Z])

**Goal:** [What I'll be able to do] [Same structure] **Milestone Project:** [Substantial project]

## Weekly Schedule Template

| Day | Activity | Duration | |-----|-----|

## Common Pitfalls to Avoid

- [Pitfall 1] · How to avoid it

- [Pitfall 2] · How to avoid it

## How to Know You're Ready

- [ ] Checklist of competencies

### Example Use:

"I want to learn system design for big tech interviews. I'm a mid-level developer with 3 years of experience. I have 10 hours per week and 2 months."

### Expected Result:

A personalized, structured learning path with specific resources, timelines, and milestone projects. Like having a mentor create a custom curriculum for you.

---

## Prompt #29: The SWOT Analyzer

### Prompt:

Perform a comprehensive SWOT analysis for [SUBJECT · company, product, project, career move]

### Context:

- Industry: [INDUSTRY]
- Stage: [startup / growth / mature / declining]
- Competitors: [MAIN COMPETITORS]
- Current situation: [BRIEF DESCRIPTION]

Provide:

## SWOT Matrix

### · Strengths (Internal, Positive)

#	Strength	Evidence	How to Leverage

### · Weaknesses (Internal, Negative)

#	Weakness	Impact	How to Mitigate

### · Opportunities (External, Positive)

#	Opportunity	Timeline	Action Required

### · Threats (External, Negative)

#	Threat	Probability	Contingency Plan

## Strategic Implications

### SO Strategies (Strengths × Opportunities)

- Use [Strength] to capture [Opportunity]: [specific action]

## WO Strategies (Fix Weaknesses to capture Opportunities)

- Address [Weakness] to unlock [Opportunity]: [specific action]

## ST Strategies (Use Strengths to counter Threats)

- Deploy [Strength] against [Threat]: [specific action]

## WT Strategies (Minimize Weaknesses, avoid Threats)

- Defensive move: [specific action]

## Top 3 Priority Actions (next 90 days)

```
Example Use:
SWOT analysis for a new AI chatbot startup entering the customer
service market.
Expected Result:
A strategic analysis with specific, actionable strategies . not just
a list of bullet points. The cross-strategies (SO, WO, ST, WT) are
where the real strategic insight lives.

Prompt #30: The Survey / Interview Question Designer
Prompt:
```

Design a [survey / interview guide] for the following research objective.

**Research objective:** [WHAT I WANT TO LEARN] **Target respondent:** [WHO] **Method:** [online survey / phone interview / in-person / focus group] **Desired completion time:** [MINUTES] **Sample size target:** [NUMBER]

Create:

## Screeners Questions (to qualify respondents)

[2-3 questions to ensure right audience]

## Main Questions (organized by theme)

### Section 1: [THEME]

#	Question	Type	Purpose	Skip Logic						

[Open-ended, Likert scale, multiple choice, ranking, NPS, etc.]

### Section 2: [THEME]

[Same structure]

### Section 3: [THEME]

[Same structure]

## Demographic Questions (at the end)

[Age, role, experience, etc. · only what's relevant]

## Design Notes:

- Question ordering rationale
- Potential biases to watch for
- How to analyze results (suggested methods)
- Statistical significance: minimum sample needed

## Pre-Test Checklist:

- ☐ No double-barreled questions
- ☐ No leading questions
- ☐ Response options are exhaustive and mutually exclusive
- ☐ Estimated completion time confirmed
- ☐ Mobile-friendly format

### Example Use:

"I want to understand why users churn from our SaaS product in the first 30 days. Target: 50 churned users."

### Expected Result:

A research-ready survey or interview guide with proper methodology, bias-free questions, and analysis guidance. Professional market research without the consultant fee.

---

# · BUSINESS (Prompts #31-#40)

---

## Prompt #31: The Business Model Evaluator

### Prompt:

Evaluate the following business idea using a structured framework.

**Business idea:** [DESCRIBE IN 2-3 SENTENCES] **Target market:** [WHO] **Revenue model:** [HOW YOU'LL MAKE MONEY] **My resources:** [Time, money, skills, team available]

Evaluate against these criteria (score each 1-10 with reasoning):

- 1 **Market Size** · Is this market big enough?
- 2 **Problem Severity** · How painful is the problem? (vitamin vs painkiller)
- 3 **Willingness to Pay** · Will people actually pay? Evidence?
- 4 **Competition** · Who else is doing this? What's the moat?
- 5 **Execution Complexity** · How hard is this to build/deliver?
- 6 **Time to Revenue** · How fast can this generate income?
- 7 **Scalability** · Can this grow without proportional cost increase?
- 8 **Unfair Advantage** · What do you have that others don't?
- 9 **Unit Economics** · CAC, LTV, margins · do they work?
- 10 **Personal Fit** · Does this match your skills and interests?

Then provide:

- **Overall Score** (/100) with tier: · Go | · Proceed with caution | · Rethink
- **Top 3 Risks** and how to validate/mitigate each
- **Minimum Viable Test** · Cheapest way to validate demand (under \$100, under 1 week)
- **If I had to bet:** Honest 1-paragraph assessment

"AI-powered resume writing service . users paste their experience, AI generates tailored resumes for specific job postings. \$29/resume or \$49/month unlimited."

An honest, structured evaluation that helps you avoid confirmation bias. The "Minimum Viable Test" section is especially valuable - it tells you the fastest way to validate before building.

### ## Prompt #32: The OKR Architect

- Time period: [Q1 2026 / H1 2026 / Annual]
- Company/team mission: [MISSION]
- Current biggest challenges: [CHALLENGE 1], [CHALLENGE 2]
- Last period's results: [BRIEF SUMMARY]
- Strategic priorities: [PRIORITY 1], [PRIORITY 2]

- [ ] Initiative 1
- [ ] Initiative 2

- · Each objective is ambitious but achievable (60-70% confidence)
- · Key Results are outcomes, not tasks
- · Key Results are measurable with a number
- · No more than 5 objectives
- · Objectives ladder up to company mission
- · Dependencies between OKRs are identified

Q1 2026 OKRs for a 15-person B2B SaaS company focused on reducing

churn and growing revenue.

### Expected Result:

A complete OKR framework with measurable Key Results, tracking methods, and quality checks. Saves the typical 2-3 meetings it takes to create good OKRs.

---

## Prompt #33: The Competitive Intelligence Report

### Prompt:

Create a competitive intelligence report for [MY COMPANY/PRODUCT] in the [INDUSTRY] space.

**My product:** [BRIEF DESCRIPTION] **Main competitors to analyze:** [COMPETITOR 1], [COMPETITOR 2], [COMPETITOR 3]

Provide:

## Market Landscape

- Market size and growth rate
- Key segments
- Industry trends affecting competition

## Competitor Deep Dive (for each)

[COMPETITOR NAME]

Category	Details	----- -----	Founded / Funding	Target customer	Pricing model	Key features
Market positioning	Estimated revenue/users	Recent moves (last 6 months)				

**Strengths:** [top 3] **Weaknesses:** [top 3] **Their likely next move:** [prediction]

## Competitive Positioning Map

(Describe a 2x2 matrix)

- X-axis: [DIMENSION 1 · e.g., price]
- Y-axis: [DIMENSION 2 · e.g., feature complexity]
- Where each player sits and why

## Opportunities They're Missing

- [Gap 1]: Why no one is doing this + how to exploit
- 

## Competitive Strategy Recommendations

- 1 **Differentiate on:** [specific angle]
- 2 **Don't compete on:** [where you'll lose]
- 3 **Quick wins:** [things to ship this quarter]
- 4 **Long-term moat:** [what to build over time]

### Example Use:

Competitive analysis for an AI writing tool vs Jasper, Copy.ai, and

Writesonic.

### Expected Result:

A strategic competitive report that goes beyond feature comparison to provide actionable positioning and strategy recommendations.

---

## Prompt #34: The Financial Model Scaffolder

### Prompt:

Help me build a financial model / projection for [BUSINESS].

**Business type:** [SaaS / e-commerce / service / marketplace / other] **Stage:** [pre-revenue / early revenue / growth]

**Current numbers (if any):**

- Monthly revenue: \$[X]
- Monthly expenses: \$[X]
- Customers: [X]
- Growth rate: [X]% month-over-month

**Assumptions I need help with:** [List any specific assumptions you're unsure about]

Create:

## Revenue Model

Revenue Stream	Pricing	Assumption	Month 1	Month 6	Month 12
-----	-----	-----	-----	-----	-----

## Cost Structure

Category	Type (Fixed/Variable)	Monthly Cost	Scales With	-----	-----	-----	-----
----------	-----------------------	--------------	-------------	-------	-------	-------	-------

## Monthly Projection (12 months)

Month	Revenue	COGS	Gross Profit	OpEx	Net Profit	Cash Balance
-----	-----	-----	-----	-----	-----	-----

## Key Metrics

Metric	Month 1	Month 6	Month 12	-----	-----	-----	-----	MRR		Customer count		CAC
	LTV		LTV:CAC Ratio		Burn rate		Runway (months)		Gross margin %			

## Sensitivity Analysis

Scenario	Revenue Change	Impact on Break-Even	-----	-----	-----	-----	Optimistic (+50% growth)		Base case		Pessimistic (-30% growth)	
----------	----------------	----------------------	-------	-------	-------	-------	--------------------------	--	-----------	--	---------------------------	--

## Break-Even Analysis

- Break-even point: Month [X]
- Required monthly revenue: \$[X]
- Required customer count: [X]

## Assumptions Log

[Every assumption listed explicitly so you can adjust]

```
Example Use:
12-month projection for a Gumroad digital product business starting
from zero.
Expected Result:
A complete financial model scaffolding with formulas, assumptions,
and sensitivity analysis. Not a full spreadsheet, but the structure
and logic you can plug into Excel/Sheets.

Prompt #35: The Email Negotiator
Prompt:
```

Help me write an email for a [NEGOTIATION TYPE] situation.

### Context:

- Relationship: [client / employer / vendor / landlord / partner]
- What I want: [DESIRED OUTCOME]
- What they probably want: [THEIR LIKELY POSITION]
- My leverage: [WHAT GIVES ME BARGAINING POWER]
- Their leverage: [WHAT GIVES THEM POWER]
- Relationship importance: [one-time / ongoing / critical]
- Previous communication: [CONTEXT]

**My style preference:** [assertive / collaborative / diplomatic]

Provide:

## Strategy Brief (for my eyes only)

- Recommended approach and why
- BATNA (Best Alternative to Negotiated Agreement)
- Anchoring strategy
- Key concessions I can make (and their order)

## The Email

[Full email · professional, persuasive, not aggressive]

## Key Principles Used

- [Principle 1] · how it's applied
- [Principle 2] · how it's applied

## If They Push Back

**Response A** (if they say [LIKELY OBJECTION 1]): [Reply template]

**Response B** (if they say [LIKELY OBJECTION 2]): [Reply template]

**Walk-Away Response** (if they won't budge): [Professional exit template]

```

Example Use:
Negotiating a 20% rate increase with a long-term client who's been
paying below market rate.
Expected Result:
A strategically sound email with backup responses for each possible
reaction. The Strategy Brief ensures you understand the negotiation
dynamics before sending anything.

Prompt #36: The SOW / Proposal Generator
Prompt:

```

Create a professional Statement of Work (SOW) / project proposal for the following engagement.

**Client:** [CLIENT NAME / INDUSTRY] **Project:** [PROJECT DESCRIPTION] **Duration:** [TIMELINE] **Budget range:** [IF KNOWN]

**My services/deliverables:**

- [DELIVERABLE 1]
- [DELIVERABLE 2]
- [DELIVERABLE 3]

Generate:

## Project Proposal / SOW

### 1. Executive Summary

[2-3 sentences · the problem, our solution, expected outcome]

### 2. Scope of Work

In Scope:

- [Specific deliverable with description]

Out of Scope:

- [Explicitly excluded items · critical for preventing scope creep]

### 3. Deliverables & Timeline

Phase	Deliverable	Duration	Deadline

### 4. Pricing

Item	Description	Price	
			[Itemized or project-based pricing]

**Payment terms:** [e.g., 50% upfront, 50% on delivery]

### 5. Assumptions & Dependencies

- [What you need from the client]
- [Timeline dependencies]

## 6. Change Management

- How scope changes are handled
- Additional work pricing

## 7. Acceptance Criteria

- How deliverables are approved
- Revision rounds included

## 8. Terms

- Intellectual property
- Confidentiality
- Cancellation policy

### Example Use:

Proposal for a website redesign project for a mid-size e-commerce company.

### Expected Result:

A professional, comprehensive proposal ready to send to the client. Protects you with clear scope, change management, and terms while looking polished.

---

## Prompt #37: The Meeting Agenda Builder

### Prompt:

Create an effective meeting agenda for the following meeting.

**Meeting type:** [standup / strategy / brainstorm / review / 1-on-1 / all-hands / client] **Duration:** [MINUTES]

**Attendees:** [ROLES · not names] **Meeting goal:** [ONE CLEAR SENTENCE · what must be true by the end] **Pre-work required:** [WHAT PEOPLE SHOULD PREPARE]

Generate:

Meeting Agenda: [TITLE]

**Date:** [DATE] | **Duration:** [X] min | **Facilitator:** [ROLE]

### Pre-Meeting

- [ ] [Pre-work item 1 · assigned to ROLE]
- [ ] [Pre-work item 2 · assigned to ROLE]

### Agenda

| Time | Duration | Topic | Owner | Type | Output | |-----|-----|-----|-----|-----|-----| | 0:00 | 2 min | Opening + goal alignment | Facilitator | Inform | Shared understanding | [Continue with specific time blocks] | [End-5] | 5 min | Action items + next steps | All | Decide | Assigned tasks |

Type Legend:

- · Inform · One-way update
- · Discuss · Two-way input needed
- · Decide · Decision must be made
- · Brainstorm · Generate ideas

## Parking Lot Template

| Topic | Raised By | Follow-Up Owner | |-----|-----|-----|

## Post-Meeting (within 24 hours)

- [ ] Send meeting notes to all attendees
- [ ] Create tickets for action items
- [ ] Schedule follow-up if needed

## Ground Rules

- [2-3 meeting norms · e.g., "cameras on," "one speaker at a time"]

### Example Use:

60-minute quarterly strategy review with leadership team (5 people).

### Expected Result:

A tight, time-boxed agenda that prevents meetings from meandering. The Type system ensures everyone knows what's expected for each topic (listen, discuss, or decide).

---

## Prompt #38: The Pricing Strategy Advisor

### Prompt:

Help me determine the right pricing strategy for [PRODUCT/SERVICE].

**Product:** [DESCRIPTION] **Current price:** [IF EXISTS · d'new product"] **Cost to deliver:** [VARIABLE + FIXED COSTS] **Target customer:** [WHO · with willingness to pay indicator] **Competitors' pricing:** [COMPETITOR: PRICE, COMPETITOR: PRICE] **Business goal:** [maximize revenue / maximize market share / premium positioning]

Analyze:

## Pricing Approaches

Approach	Your Price	Rationale	Pros	Cons	Cost-plus	\$	
Value-based	\$	Competitor-based	\$	Penetration	\$	Premium/Skimming	\$

## Recommended Price Point: \$[X]

- **Why:** [detailed reasoning]
- **Positioning:** [how this price positions you in the market]

## Pricing Structure

- [ ] One-time purchase

- ☐ Subscription (monthly/annual)
- ☐ Tiered pricing
- ☐ Usage-based
- ☐ Freemium [Recommend the best structure and explain why]

## Tier Design (if applicable)

Tier	Price	Features	Target Segment				

## Price Testing Plan

- 1 How to validate this price before committing
- 2 A/B testing approach
- 3 Metrics to watch

## Price Increase Roadmap

- When to raise prices and by how much
- How to communicate increases

### Example Use:

Pricing a new AI-powered SEO tool for small business owners.

Competitors charge \$29-\$99/month.

### Expected Result:

A data-informed pricing recommendation with multiple approaches analyzed, testing plan, and long-term roadmap. Avoids the common mistake of underpricing or copying competitors blindly.

---

## Prompt #39: The Customer Persona Builder

### Prompt:

Create a detailed customer persona for [PRODUCT/SERVICE].

**Product:** [WHAT YOU SELL] **What data I have:** [Existing customer data, surveys, interviews, or "starting from scratch"] **Market:** [B2B / B2C / Both]

Build the persona:

[PERSONA NAME] · [One-Line Description]

## Demographics

Attribute	Detail			Age range	Gender	Location	Income/Budget	Education	Job title/Role	Company size	[B2B only]

## Psychographics

- **Goals:** [What they're trying to achieve · professionally and personally]
- **Frustrations:** [What keeps them up at night]
- **Values:** [What matters most to them]
- **Fears:** [What they're afraid of regarding this purchase]
- **Motivations:** [What drives their decisions]

## Buying Behavior

- **How they find products:** [channels]
- **Decision-making process:** [impulse / research-heavy / committee]
- **Budget sensitivity:** [price-conscious / value-driven / premium buyer]
- **Objections:** [Top 3 reasons they might NOT buy]
- **Trigger events:** [What makes them actively look for a solution]

## A Day in Their Life

[3-4 sentence narrative of a typical day, highlighting where your product fits]

## Messaging That Resonates

| · Say This | · Not This |-----|-----| | [Message that connects] | [Message that falls flat] |

## Where to Reach Them

| Channel | Activity | Best Content Type | |-----|-----|-----|

## The "Job to Be Done"

"When I [SITUATION], I want to [MOTIVATION], so I can [OUTCOME]."

### Example Use:

Customer persona for an AI prompt pack sold on Gumroad.

### Expected Result:

A rich, actionable persona that informs marketing copy, product features, pricing, and channel strategy. Goes far beyond basic demographics into psychographics and buying behavior.

---

## Prompt #40: The Weekly Review Framework

### Prompt:

Help me conduct a structured weekly review. I'll provide my data, and you help me extract insights and plan.

### This week's data:

- Hours worked: [X]
- Revenue: \$[X]
- Key tasks completed: [LIST]
- Tasks not completed: [LIST]
- Biggest win: [WIN]
- Biggest challenge: [CHALLENGE]
- Energy level (1-10): [X]
- Satisfaction level (1-10): [X]

**Goals for this period:** [LIST CURRENT GOALS]

Provide:

Weekly Review: Week of [DATE]

## · Scorecard

Metric	This Week	Last Week	Trend	Target					
--------	-----------	-----------	-------	--------	--	--	--	--	--

## · Wins (celebrate these)

- [Win + why it matters]

## · Misses (learn from these)

- [Miss + root cause + fix]

## · Insights

- What worked that I should do MORE of?
- What didn't work that I should STOP?
- What should I START doing?

## · Next Week Priorities

#	Priority	Expected Outcome	Time Required	Aligned Goal
1				
2				
3				

## · Energy Management

- Highest energy tasks this week: [identify patterns]
- Lowest energy tasks: [identify drains]
- Recommendation: [scheduling adjustment]

## .. Time Block Suggestion for Next Week

Day	Deep Work	Admin	Creative	Rest					
-----	-----------	-------	----------	------	--	--	--	--	--

### Example Use:

Paste your weekly data and get a structured analysis with actionable next-week planning.

### Expected Result:

A CEO-level weekly review that tracks trends, celebrates wins, diagnoses misses, and creates a specific action plan. Turns reflection from a vague exercise into a sharp strategic tool.

---

# · CREATIVE (Prompts #41-#50)

---

## Prompt #41: The Brainstorm Explosion

### Prompt:

I need creative ideas for [CHALLENGE/PROJECT]. Run a structured brainstorming session.

**Challenge:** [DESCRIBE THE PROBLEM OR OPPORTUNITY] **Constraints:** [BUDGET, TIME, RESOURCES, RULES] **Target audience:** [WHO] **What's been tried before:** [EXISTING APPROACHES]

Generate ideas in 4 rounds:

Round 1: Obvious Solutions (10 ideas)

[The first ideas anyone would think of · get these out of the way]

## Round 2: Steal from Other Industries (10 ideas)

[How do other industries solve similar problems?]

- "What would [Uber/Netflix/Airbnb/Nike] do?"

## Round 3: Constraint Removal (10 ideas)

[If you had unlimited budget/time/resources, what would you do?] [Then: how to approximate these with current constraints]

## Round 4: Absurd · Brilliant (10 ideas)

[Start with deliberately silly ideas, then find the kernel of genius in each]

## Evaluation Matrix

#	Idea	Impact (1-5)	Feasibility (1-5)	Novelty (1-5)	Total
----	-----	-----	-----	-----	-----

## Top 3 Recommendations

- 1 **Quick Win:** [Highest feasibility + decent impact]
- 2 **Big Bet:** [Highest impact, needs more resources]
- 3 **Dark Horse:** [Unconventional but could be breakthrough]

For each top 3: next step to explore further (1 sentence).

### Example Use:

"I need ideas to promote my digital product store with zero budget."

### Expected Result:

40 ideas organized by thinking style, with a scoring matrix to prioritize. The multi-round approach consistently produces better ideas than unstructured brainstorming.

---

## Prompt #42: The Story Structure Builder

### Prompt:

Help me develop a compelling story/narrative for [PURPOSE].

**Purpose:** [brand story / pitch deck / content piece / speech / video script] **Core message:** [THE ONE THING the audience should remember] **Audience:** [WHO] **Emotional journey:** [How should they FEEL at the end?] **Length:** [WORD COUNT or DURATION]

Build the narrative using:

## The Hook (first 10%)

[Open with one of these:]

- A surprising statistic
- A vivid scene (show, don't tell)
- A provocative question

- A counterintuitive statement [Write it out]

## The Setup (next 20%)

- Introduce the character/protagonist (can be the audience themselves)
- Establish the world/context
- Plant the seed of the problem

## The Conflict (next 30%)

- The problem deepens
- Failed attempts or misconceptions
- The "all is lost" moment
- Emotional low point

## The Transformation (next 25%)

- The insight/discovery/turning point
- The solution emerges
- Evidence it works (data, testimonial, case study)

## The Resolution (final 15%)

- The new reality
- Concrete results/vision
- Call to action that feels earned, not forced

## Story Elements Checklist:

- · Specific > Generic (names, numbers, places)
- · Sensory details (what you see, hear, feel)
- · Dialogue (even a single quote adds humanity)
- · Tension (conflict drives engagement)
- · Transformation (character changes)

### Example Use:

"Brand story for our AI productivity tool · for use on the 'About' page and investor pitch."

#### Expected Result:

A structured narrative that creates emotional connection with the audience. Turns dry facts into a compelling story that people remember and share.

---

## Prompt #43: The Social Media Content Calendar

### Prompt:

Create a 30-day social media content calendar for [BRAND/PERSON].

**Platform(s):** [Instagram / X / LinkedIn / TikTok / all] **Brand voice:** [DESCRIBE IN 3 ADJECTIVES] **Goals:** [awareness / engagement / sales / community] **Product/service:** [WHAT YOU SELL] **Target audience:** [WHO] **Posting frequency:** [X posts per week per platform] **Content pillars (themes):** [PILLAR 1], [PILLAR 2], [PILLAR 3], [PILLAR 4]

Generate:

## Content Pillars Explained

Pillar	% of Content	Purpose	Example Topics
--------	--------------	---------	----------------

## 30-Day Calendar

Day	Platform	Content Type	Pillar	Caption/Hook (first line)	CTA	Visual Note
1						
[... through Day 30]						

## Content Types Rotation

- Educational (how-to, tips, tutorials): X%
- Entertaining (memes, stories, relatable): X%
- Engagement (polls, questions, debates): X%
- Promotional (product, offer, CTA): X%
- Personal (behind-the-scenes, story): X%

## Hashtag Strategy

**Brand hashtags:** [3 custom] **Community hashtags:** [5 medium-sized] **Trending to monitor:** [3 topic-based]

## Weekly Themes (optional structure)

Day	Theme
Mon	Motivation Monday [etc.]

## KPIs to Track Weekly

Metric	Target	How to Improve
--------	--------	----------------

### Example Use:

30-day content calendar for AI Toolkit Lab (digital products on Gumroad) across X and LinkedIn.

### Expected Result:

A complete, ready-to-execute content calendar with specific hooks, CTAs, and visual notes. Eliminates the "what do I post today?" problem for an entire month.

---

## Prompt #44: The Video Script Writer

### Prompt:

Write a video script for [VIDEO TYPE].

**Platform:** [YouTube / TikTok / Instagram Reels / Course / Webinar] **Duration:** [SECONDS or MINUTES] **Topic:** [TOPIC] **Audience:** [WHO] **Goal:** [educate / entertain / sell / build authority] **Style:** [talking head / voiceover + b-roll / screen recording / animated] **Tone:** [TONE]

Script format:

[VIDEO TITLE]

### Hook options (test these):

- 1 [Hook A · question]
- 2 [Hook B · bold statement]
- 3 [Hook C · pattern interrupt]

| Timestamp | Visual | Script (voiceover/dialogue) | Notes | |-----|-----|-----|-----| |  
0:00-0:03 | [what's on screen] | [HOOK · first 3 seconds are critical] | Pattern interrupt | | 0:03-0:15 | | [Context · why this matters] | Build curiosity | | 0:15-0:45 | | [Main content point 1] | Use B-roll here | [... continue for full duration] | [Last 15s] | | [CTA] | End screen elements |

### Thumbnail Concepts (3 options)

- 1 [Description · text + visual]
- 2 [Description]
- 3 [Description]

### Title Options (5, SEO-optimized)

- 1 [Title] · CTR angle [curiosity / how-to / number / contrarian] [...]

### Description Template

[First 2 lines visible above fold] [...] [Timestamps] [Links] [Hashtags]

### Retention Strategy Notes

- Key retention hooks at: [timestamps]
- Pattern interrupts at: [timestamps]
- "Stay till the end" tease at: [timestamp]

### Example Use:

5-minute YouTube video: "5 AI Prompts That Will Save You 10 Hours Per Week"

### Expected Result:

A production-ready script with visual cues, timing, retention strategies, and SEO-optimized title/description. Like having a professional scriptwriter and YouTube strategist in one.

---

## Prompt #45: The Brand Voice Guide

### Prompt:

Create a comprehensive brand voice guide for [BRAND/COMPANY].

**Brand name:** [NAME] **Industry:** [INDUSTRY] **Mission:** [ONE SENTENCE] **Target audience:** [WHO]

**Competitors' voices:** [COMPETITOR A is formal, COMPETITOR B is edgy, etc.] **Desired perception:** [How do you want people to DESCRIBE your brand?]

Generate:

### Brand Voice Overview

## Voice Attributes (3 core traits)

| Trait | Description | Scale (1-10) | |-----|-----|-----| | [e.g., Bold] | [what this means for us] | [how much of this] | | [e.g., Helpful] | | | [e.g., Witty] | | |

## Voice Spectrum

Formal ..... Casual  
Serious ..... Playful  
Technical ..... Simple  
Reserved ..... Bold

## Writing Do's and Don'ts

| · Do | 't Do | |-----|-----| | [Specific example] | [Specific counter-example] | [10 pairs]

## Vocabulary Guide

| Use These Words | Instead of These | |-----|-----| | [on-brand word] | [off-brand word] | [15-20 pairs]

## Tone Variations by Context

| Context | Tone Shift | Example | |-----|-----|-----| | Social media | More casual, more emoji | [sample sentence] | | Customer support | More empathetic, more patient | [sample sentence] | | Sales page | More urgent, more confident | [sample sentence] | | Error message | More honest, more helpful | [sample sentence] | | Email newsletter | More personal, more conversational | [sample sentence] |

## Sample Copy

**Tagline options:** [3 options] **Bio (Twitter/X):** [160 chars] **Bio (LinkedIn):** [300 chars] **Email signature:** [template]  
**404 page:** [on-brand error message] **Thank you page:** [post-purchase message]

## Grammar & Style Rules

- Oxford comma: [yes/no]
- Capitalization: [sentence case / title case]
- Numbers: [spell out under 10 / always numerals]
- Emoji usage: [heavy / light / never]
- Exclamation points: [policy]

### Example Use:

Brand voice guide for "AI Toolkit Lab" · digital products for AI enthusiasts and professionals.

### Expected Result:

A complete brand voice guide that any team member, freelancer, or AI tool can follow to produce consistent, on-brand content. The "Tone Variations" section is especially practical for real-world application.

---

## Prompt #46: The Product Description Writer

### Prompt:

Write a compelling product description for [PRODUCT].

**Product:** [NAME + what it is] **Price:** [PRICE] **Platform:** [Gumroad / Amazon / Shopify / Etsy / website] **Target buyer:** [WHO - be specific about their situation] **Key features:** [LIST 5-7 FEATURES] **Main competitor:** [WHAT THEY'D BUY INSTEAD] **Unique advantage:** [WHY THIS IS BETTER]

Generate 3 versions:

### Version A: Story-Led (emotional)

[Opens with the buyer's problem/frustration, leads to the product as the solution]

- 300-400 words
- PAS framework (Problem-Agitate-Solve)

### Version B: Feature-Led (logical)

[Opens with the product and its capabilities, proves value with specifics]

- 200-300 words
- Feature-Benefit format with bullet points

### Version C: Social-Proof-Led (credibility)

[Opens with results/testimonials, then describes the product]

- 200-300 words
- Data-driven, results-focused

### For Each Version Include:

- Headline (with power word)
- Sub-headline
- Body copy
- Bullet points (what's included)
- Guarantee/risk reversal
- CTA button text
- Urgency element (if applicable)

### SEO Elements:

- Suggested meta title (60 chars)
- Meta description (155 chars)
- Keywords to include naturally

### Example Use:

Product description for the 50-prompt productivity pack on Gumroad.

### Expected Result:

Three distinct product descriptions optimized for different buyer psychologies. You can A/B test them or combine the best elements of each.

---

## Prompt #47: The Presentation Outliner

### Prompt:

Create a presentation outline for [TOPIC].

**Audience:** [WHO] **Duration:** [MINUTES] **Setting:** [conference / team meeting / client pitch / webinar / classroom]  
**Goal:** [inform / persuade / inspire / teach / sell] **Key message:** [ONE SENTENCE · if they remember nothing else]  
**Their current knowledge:** [WHAT DO THEY ALREADY KNOW] **Their biggest objection/question:** [WHAT THEY'RE SKEPTICAL ABOUT]

Generate:

## Slide-by-Slide Outline

Slide #	Title	Content	Speaker Notes	Visual Suggestion	Time
1	[Title slide]	[Opening line to say]	[Visual]	30s	2
	[Hook/Opening]	[Talk track]	1-2 min	[... continue]	

## Presentation Arc

[Attention] · [Problem] · [Insight] · [Solution] · [Evidence] · [Action]

## Opening Options (pick one)

A) Start with a shocking statistic B) Start with a story C) Start with a question to the audience D) Start with a bold, contrarian statement [Write each option out]

## Closing Options (pick one)

A) Call to action B) Return to the opening story (full circle) C) Vision of the future D) Challenge to the audience [Write each option out]

## Audience Engagement Points

Slide #	Technique	Purpose	[e.g., "Raise your hand if...", poll, Q&A, group discussion]
---------	-----------	---------	--------------------------------------------------------------

## Design Principles

- Max words per slide: [6-8]
- Font size minimum: [24pt]
- One idea per slide
- Visual > Text always

### Example Use:

15-minute pitch for an AI productivity tool to a room of startup investors.

### Expected Result:

A complete presentation outline with speaker notes, timing, engagement points, and design guidance. Turns a blank canvas into a structured narrative ready for slide creation.

---

## Prompt #48: The Creative Brief

### Prompt:

Write a creative brief for [PROJECT TYPE].

**Project:** [CAMPAIGN / WEBSITE / VIDEO / BRAND LAUNCH / etc.] **Client/Brand:** [NAME] **Budget:** [RANGE] **Timeline:** [DEADLINE] **Stakeholders:** [WHO NEEDS TO APPROVE]

## Creative Brief

### 1. Background

[2-3 sentences · What's happening? Why now? What triggered this project?]

### 2. Objective

[One clear, measurable objective]

- Primary KPI: [METRIC]
- Success looks like: [SPECIFIC OUTCOME]

### 3. Target Audience

**Primary:** [WHO · demographics + psychographics] **Secondary:** [WHO]

**Current perception:** [What do they think now?] **Desired perception:** [What should they think after?]

### 4. Key Message

**One sentence:** [THE message] **Supporting messages:**

- 1 [Support point 1]
- 2 [Support point 2]
- 3 [Support point 3]

**Mandatory inclusions:** [Legal, brand elements, hashtags, etc.]

### 5. Tone & Feel

[3 adjectives that describe the creative direction] **Reference/Inspiration:** [2-3 examples of work with similar tone]

### 6. Deliverables

| Deliverable | Specs | Due Date | |-----|-----|-----|

### 7. Constraints

- Budget: [LIMIT]
- Brand guidelines: [LINK or summary]
- Legal/compliance: [REQUIREMENTS]

### 8. Approval Process

| Stage | Approver | Date | |-----|-----|-----|

### 9. Measurement Plan

[How will we know this worked?]

```
Example Use:
Creative brief for launching the AI Toolkit Lab Gumroad store.
Expected Result:
A professional creative brief that aligns all stakeholders and
gives clear direction. Prevents the "that's not what I meant"
problem in creative projects.

Prompt #49: The Name Generator
Prompt:
```

Generate names for [WHAT NEEDS A NAME].

**Type:** [company / product / feature / event / campaign / newsletter / podcast] **Industry:** [INDUSTRY] **Target audience:** [WHO] **Tone:** [fun / professional / techy / luxurious / friendly / edgy] **Key attributes to convey:** [ATTRIBUTE 1], [ATTRIBUTE 2], [ATTRIBUTE 3] **Must avoid:** [WORDS, THEMES, or ASSOCIATIONS TO AVOID] **Name style preference:** [real word / made-up word / compound / acronym / no preference]

Generate names in categories:

## Descriptive Names (clearly states what it is)

1 [Name] ·[why it works] 2-10. [...]

## Evocative Names (suggests a feeling or metaphor)

1 [Name] ·[why it works] 2-10. [...]

## Abstract / Invented Names (unique, brandable)

1 [Name] ·[why it works] 2-5. [...]

## Compound / Portmanteau Names

1 [Name] ·[what words it combines] 2-5. [...]

## Top 5 Overall (ranked)

#	Name	Style	Domain Available? (.com check needed)	Social Handle Available?
---	-----	-----	-----	-----

## Quick Vibes Check

Name	Says "trust me"	Says "we're fun"	Says "we're innovative"	Memorable?
-----	-----	-----	-----	-----

For the top 3, also provide:

- Tagline suggestion
- How it looks as a logo (visual description)
- Potential downsides (negative associations, pronunciation issues, international concerns)

### Example Use:

Name for a weekly AI newsletter targeting knowledge workers.

### Expected Result:

30+ name options across different naming styles, with evaluation criteria and vibes check. Eliminates weeks of team brainstorming and domain-squatting research.

---

## Prompt #50: The "Make It Better" Universal Improver

### Prompt:

I have [CONTENT TYPE] that's okay but not great. Make it significantly better.

**What it is:** [email / landing page / resume / pitch / social post / proposal / code / other] **Current version:** "" [PASTE YOUR CONTENT] ""

**What "better" means to me:** [more persuasive / more concise / more professional / more engaging / more clear / all of the above] **Target audience:** [WHO WILL SEE THIS] **Goal:** [WHAT SHOULD THIS ACHIEVE]

Improve it in 3 levels:

### Level 1: Quick Fixes (keep the structure, polish the execution)

- Fix grammar, typos, awkward phrasing
- Strengthen weak sentences
- Improve word choice
- Show changes with ~~strikethrough~~ · **bold new text**

### Level 2: Structural Improvements (reorganize for impact)

- Reorder for better flow
- Cut what doesn't serve the goal
- Add what's missing
- Strengthen the opening and closing
- Full rewrite with same core content

### Level 3: "Wow" Version (reimagine the approach)

- Different angle or framework
- Unexpected opening
- More creative/bold approach
- The version that makes you go "I wish I'd written that"

## What Changed & Why

| Change | Rationale | |-----|-----|

## Improvement Score

| Dimension | Before (1-10) | After (1-10) | |-----|-----|-----| | Clarity | | | Persuasiveness | | |  
Engagement | | | Professionalism | | | Memorability | | |

### Example Use:

Paste a cold outreach email, LinkedIn profile summary, or product description that feels "meh."

### Expected Result:

Three increasingly bold improvements, each with clear rationale. The Level 3 version often reveals an entirely better approach you hadn't considered. Use this as your final polish on anything important.

---

## # · APPENDIX

### ## How to Get Even Better Results

#### ### 1. Chain Your Prompts

Don't ask for everything at once. Use these prompts as starting points, then follow up:

- "Make the tone more casual"
- "Expand on point #3"
- "Give me 5 more options like option B"
- "Now adapt this for LinkedIn instead of Twitter"

#### ### 2. Provide Context

The more context you give, the better the output:

- · "Write a blog post about AI"
- · "Write a blog post about AI productivity tools for non-technical small business owners who are skeptical about AI but curious. Tone: friendly expert. Length: 1,500 words."

#### ### 3. Use Role Prompting

Starting with "You are a [EXPERT ROLE]" consistently improves output quality. Every prompt in this pack uses this technique.

#### ### 4. Iterate, Don't Regenerate

If the output is 70% right, give specific feedback on the 30% that's wrong rather than starting over:

- "Great structure, but make the examples more specific to SaaS"
- "Love points 1-3, but point 4 is too generic. Replace with something more actionable"

#### ### 5. Save Your Best Outputs as Templates

When you get a response that's perfect, save it. Next time, paste it as an example:

- "Write something in this style: [PASTE EXAMPLE]"
